## **DETAILED ACTION**

### ***Rejections Repeated***

1. The 35 U.S.C. 103(a) rejection of claims 24-35,37-42 over Talbot in view of Robbins and in further view of Hoffman has been repeated for the reasons previously made in office action 1/27/2004.

As to the new limitation, "wood product for use as exterior trim on the exterior of a building" is an intended use. It has been held that a recitation with respect to the manner in which the claimed article is intended to be employed does not differentiate the claimed article from a prior art article satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

2. The 35 U.S.C. 103(a) rejection of claims 36 and 43 over Talbot et al. in view of Robbins and Hoffman and in further view of Nichols has been repeated for the reasons previously made in office action 1/27/2004.

### ***Response to Arguments***

3. Applicant's arguments filed 10/27/2004 have been fully considered but they are not persuasive.

In response to applicant's argument that the Talbot et al. reference is a trim piece for interior applications and are unsuitable for exterior applications and that applicant's wood product is for use as exterior trim on the exterior of a building is a statement of an intended use. It has been held that a recitation with respect to the manner in which the claimed article is intended to be employed does not differentiate the claimed article from

a prior art article satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Talbot et al. teaches veneer profile wrapping over a substrate (figure 1) and Robbins teaches that paper may be substituted for the surface veneer sheet or may be adhesively bonded to the exposed surfaces of the wood veneer sheets (col. 7 lines 15-19) for the purpose of providing improved dimensional stability of laminated veneer lumber that can be made on conventional apparatus as a commercially acceptable production rate (col. 2 lines 65- col. 3 lines 1-2).

#### ***Response to Declaration***

4. The Johnson declaration under 37 CFR 1.132 filed 11/7/03 is insufficient to overcome the rejection of claims 24-43 based upon U.S.C. 103 rejection as set forth in the last Office action because: It states that the claimed subject matter solved a problem that was long standing in the art. However, there is no showing that others of ordinary skill in the art were working on the problem and if so, for how long. In addition, there is no evidence that if persons skilled in the art who were presumably working on

the problem knew of the teachings of the above cited references, they would still be unable to solve the problem. See MPEP § 716.04.

The Caylor declaration under 37 CFR 1.132 filed 11/7/03 is insufficient to overcome the rejection of claims 24-43 based upon U.S.C. 103 rejection as set forth in the last Office action because: It states that the claimed subject matter solved a problem that was long standing in the art. However, there is no showing that others of ordinary skill in the art were working on the problem and if so, for how long. In addition, there is no evidence that if persons skilled in the art who were presumably working on the problem knew of the teachings of the above cited references, they would still be unable to solve the problem. See MPEP § 716.04.

The Sangret declaration under 37 CFR 1.132 filed 11/7/03 is insufficient to overcome the rejection of claims 24-43 based upon U.S.C. 103 rejection as set forth in the last Office action because: It states that the claimed subject matter solved a problem that was long standing in the art. However, there is no showing that others of ordinary skill in the art were working on the problem and if so, for how long. In addition, there is no evidence that if persons skilled in the art who were presumably working on the problem knew of the teachings of the above cited references, they would still be unable to solve the problem. See MPEP § 716.04.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
